

Joshua Buhain

I think your lab is very interesting and easy to play. However, when I was playing it was a little laggy. Also, the game would crash when the enemy would hit my player multiple times upon respawn. Other than that, I think you have a great lab.

Response:

Thank you so much for reviewing my lab! I have fixed some of the lag issues. To fix crashing the game, I have moved the player away from the enemy each time the player is hit. Thank you for the review.

William Stanley

As Joshua previously mentioned, I think your lab is easy to play and fun as well. I think the sounds match your game very well and the background music is also nice. Although there is a little bit of lag when picking up an item and getting hit by the enemy, I think your game is great!

Response:

Thank you for the kind words in your review! The lag should be fixed now and the game should run much more smoothly. I appreciate your kind words about the music and the sound effects as well. Thanks for the review.
